Adjustment of the Slovenian economy and development identity of Slovenia in the EU

The research program will deal with the convergence processes and asymmetries on theoretical and methodological levels with the possibility to be applied on the EU as a whole and especially to the position of Slovenia in those EU processes. The Great global recession has disclosed the weaknesses of the EU and raised new challenges for the researchers in economics and social sciences. Considering the paradigms in economic and social sciences of the 21st century, an interdisciplinary analysis will bring us to the new perceptions of these processes and to the possible conceptual solutions of the vital problems and developmental issues. Therefore we will continue the research on convergence process in nonfinancial sector, financial sector, development of new methodologies, and the implementation of game theory in this area of research.

The research will specifically focus on another determinant - the institutional arrangements in the host country. We expect to obtain stylized facts. Based on them findings of the research will be presented, and identified will be the proposals for action to the recipient country, how to maximize the positive economic effects of C-B M&A on functioning and growth of strategic industries.

Changes in international financial and exchange rate architecture, introduction of new currencies, growing monetary integration of countries (constitution of the euro area, euro area debt-crisis), emergence of financial crises, the recent great recession are just some of the reasons, why it is important to constantly research the financial system and its segments.

PROJECT COORDINATOR
University of Maribor, Faculty of Economics and Business

PARTNER
Faculty of Natural Sciences and Mathematics

FEB MEMBERS
Davorin Kračun, Sebastjan Strašek, Jani Beko, Klavdij Logožar, Žan Jan Oplotnik, Darja Boršič

PROJECT SUMMARY

TYPE OF PROJECT
Research Programme

DURATION

ORIGIN OF FUNDING
State budget of Slovenia

OVERALL PROJECT VALUE
81.148,00 EUR

PROJECT VALUE FOR FEB
48.700,00 EUR per year
